

Standardized Ice-free Cooling

CoolBox™ ice-free cooling and freezing container provides hours of uniform cooling, freezing or cryogenic temperature for tubes and plates. Use with re-usable cooling or freezing cartridges, or with dry ice.

In the Laboratory

Consistent Achieve temperature uniformity when cooling, (snap)freezing and thawing sample tubes and plates

Reproducible Ensure reproducible temperature profiles – every time.

Standardized Instantly standardize temperature-sensitive lab procedures

BioCision, LLC, founded by a group of scientists, biomedical engineers, and drug discovery experts, is a leading manufacturer of portable benchtop tools for ensuring reproducible sample handling and preparation.

Its patent-pending products enable researchers to achieve pre-analytical sample reproducibility and consistency – experiment to experiment, lab to lab and site to site. BioCision's highly thermally conductive bench-top tube and plate modules and complementary product lines are used by researchers in the pharmaceutical, biotechnology, academic, and health care industries worldwide.
